1 Document summary

1.1 Purpose

This is the release notes document for the Carbon Planning Tool on www.opencarbonworld.com. This document is a detailed list for the features, enhancements, known issues and fixes for the various releases for the Carbon Planning Tool web application.

1.2 History

Action	Name	Date	Notes	Version
Create	Brijesh Shetty/Srikanth Parimi	06 FEB 2009	Created for MCW Release 1.3.	Draft
Modify	Brijesh Shetty	31 MAR 2009	Updated for MCW Release 1.4	Draft
Modify	Brijesh Shetty	19 JUN 2009	Updated for My Footprint (earlier MCW) Release 1.5	Draft

Valid action types are:

- Create
- Modify
- Review
- Approve

2 System Requirements

The sections in this topic list the minimum system requirements for the application.

2.1 Software Requirements

This section lists the software installations required on your system to run the application.

2.1.1 Web Browsers

The application functions on the following web browsers:

1. Internet Explorer 7
2. Internet Explorer 6
3. Mozilla Firefox 3

3 Current Release

3.1 Release 1.5

The added features, enhancements and issues for release 1.5 are listed in the sections and sub-sections here.

3.1.1 New Features

This section details the new features in the application for this release.

SIC Code feature

This feature lets users add company information for Standard Industrial Classification in the USA. This is a mandatory selection for users.

Session Timeout feature

This feature is a security feature that automatically logs out users if there is an inactivity period greater than the set value.

Bookmarking Widget added

This is a bookmarking button added to the application. Users can now add OCW to their list of favourite sites on the web.

Help on popup forms

This is now added to provide help on the popup forms.

3.1.2 Enhancements and Modifications

This section lists the enhancements and modifications to the application in this release.

'My Carbon World' tab changed to 'My Footprint'

The 'My Carbon World' tab is now 'My Footprint'.

UI modifications to the help

This feature makes it convenient for users to use the help in a next-previous pattern and avoids the scroll down operation.

Eight rows on Footprint now

This feature is modified to accommodate and display the all footprint activities for a facility on the same page.

Units modified to 't' for metric ton and 'S/T' for short ton

This feature is modified to reflect correct convention as per the units of measurement.

3.1.3 Fixed Issues

This section lists the issues that are resolved in this release.

3.1.3.1 Major Issues

The following are the major issues resolved in this release:

Defect ID	Description
DE342	CTP Response is slow. Performance issue
DE380	Numeric fields should have max of nine digits before decimal point and two digits after decimal point
DE471	Performance issue - navigation is slow between the stops and tabs. There is a stop and train.
DE472	Adding facility name in grid displays empty screen for two seconds.
DE483	Pagination Filter is not set to default page if a Activity filter is selected
DE573	Scroll bar placement issue on navigating between trains
DE575	Equity share column grid is not consistent across different browsers.
DE580	Processing indicator is overlapped by Control drop down on Facility form in IE 6.0
DE615	Facility name edit field shows white background in IE 7
DE621	Text field behaviour is erratic.
DE622	Order of Facility entered is reversed on clicking Save for first time on facility grid
DE636	Java Test eMail not received at agreed interval
DE641	Unable to edit the goal for maximum digits before and after decimal point.
DE665	Newly added Facility on Update page does not reflect in Footprint
DE670	Clicking on Insert row icon for any activity expands all the activities with child rows.
DE671	Groups, Sources, type, Subtype and data source placement in calculate footprint and Review footprint stop.
DE674	Message error
DE692	New Child rows are not always added as the first row under the corresponding activity.
DE693	Hand icon shown on Mouse hovering the blank calculator column in parent activity.
DE706	Pagination buttons not positioned correctly in Prepare Report Stop-IE and FF

Defect ID	Description
DE709	Page Count should be displayed on top of the grids.
DE716	Blank Screen displays when clicked on Add button on Facility form in Edit Plan Stop-IE 7
DE717	Icons not shown in help content.
DE718	Issues with pagination and filtering in Calculate footprint stop.
DE727	Issue with opening a PDF file on IE6
DE732	Exception message is displayed after we get an error message on Facility overly form in Define facility stop.
DE733	Enter key doesn't work on footprint details calculator pop-up screen
DE741	Grid alignment issue on carbon plan summary for FireFox.
DE746	Graph legend issues
DE747	Goal field popup flickers on mouseover.
DE749	Few units for Goals, plan summary and sandbox aligned very close
DE752	X (close) button is missing on top right corner.
DE754	Data entered is retained after closing the browser and relogging without saving.
DE755	Session time out does not happen for all the actions on CPT.
DE756	Session Timeout message does not appear on clicking Continue button.
DE757	Session timeout popup message is displayed on clicking Back to CTP link first time after logging out
DE758	System hangs after Clicking on the LHS trains after session is timed out
DE759	Session timeout happens even without logging in
DE760	Session timed out popup window appears twice on clicking Graph on Firefox.
DE761	Session Timeout message does not appear on clicking Back button.
DE762	Sandbox PDF file content is not updated
DE763	Drop down of the stops overlaps with window which appears on clicking Add This button on IE 6
DE764	No space between the page number and First Page Pagination button on IE

Defect ID	Description
DE765	Help Paginations buttons are not aligned correctly.
DE766	Help Content overlaps with Paginations buttons and Help content displays outside the boundary in Facility Stop, calculate footprint stop and Edit Plan Stop.
DE767	Tooltips not shown for any help pagination buttons on Firefox
DE768	Help content disappears when an error message is displayed.
DE769	Help Content on forms is not specific to the fields inside the form.
DE770	Wiki help content is not displayed in Review Footprint stop.
DE771	Help content in overlay form has more gap between paragraphs on IE
DE772	Grid not displaying properly if child records are added via Footprint Details stop
DE773	No tooltip for expand and collapse icons in calculate footprint and review footprint stops.
DE775	Child rows without data in columns displays different from child rows with data in all columns.
DE776	Unable to click on rows in define facility stop IE
DE777	Page navigation not consistent across all stops after saving.
DE780	Values entered are retained on session time out
DE781	Goal value on Sandbox for base period is not converted if unit is changed
DE782	JavaScript error is displayed on IE
DE783	Facility grid becomes non editable on IE
DE784	Goal Value and Radio button issues.
DE785	Confirm action popup does not appear on clicking logout link in sandbox and MCW introduction pages on IE and FF
DE786	Help pagination buttons on sandbox page not responding
DE787	Graph is not displayed on Overlay form on IE 7 & 8
DE788	Exception error on searching with string having space
DE789	Java Script error on searching on Intro pages.
DE793	Session timeout on pagination

Defect ID	Description
DE795	SIC Category Government is not highlighted/bolded on selection
DE796	Appropriate SIC Sub Code not displayed
DE797	On selection of SIC Category, first SIC code should be selected by default.
DE798	Exception occurs on selecting a category without SIC Sub code.
DE799	Error message on SIC information popup.
DE800	JavaScript Error displayed for SIC overlay in IE6 , IE7
DE802	On Selecting a SIC Category with no SIC Sub Code, Sub code are not displayed for any other SIC Category
DE803	SIC Information is not reflected appropriately
DE804	Categories without Sub SIC Code gives Java Script error.
DE805	Values retained on clicking Cancel button.

3.1.3.2 Minor Issues

The following are the minor issues resolved in this release:

Defect ID	Description
DE563	Wrong error message displayed when a duplicate facility is added.
DE569	Help scroll bar alignment issue.
DE613	Mouse cursor is not present in Facility Name field on Facility Form. Firefox browser issue.
DE616	Require UX modifications.
DE626	Review Footprint - alignment issues for LHS for all Trains on IE 6.0 and IE 7.0.
DE628	Below Base Year text is displayed for review goal and carbon plan summary for intensity and absolute goal value.
DE629	No validation functionality for fields on Prepare Report stop.
DE631	Firefox does not display scroll bars by default on Prepare Report stop whereas on IE it does.
DE634	Goal Absolute and Intensity accepts more than nine digits for negative values.
DE635	Display for 'My goal is to reduce my GHG emission by' not consistent on Goal Details, Review Goal and Carbon Plan Summary stops.
DE637	White dotted border is displayed on LHS on selection of a train on Firefox.

Defect ID	Description
DE649	The lower edges of the edit window displayed in Edit Plan Stop are not aligned correctly in IE 7 and Firefox.
DE658	Train stop and form mismatch.
DE663	Tooltip for report shows "Edit Report" in Prepare Report Stop.
DE668	Collapse icon is not displayed correctly on in calculate footprint stop.
DE675	'Clear' button missing in Report.
DE678	Image for '=' and '-' not loaded on clicking Insert Row icon. On Firefox no icon is displayed.
DE683	Clear Functionality does not work on Calculator form and Prepare Report form.
DE685	Expand and Collapse icons are missing on Firefox.
DE701	Reporting CO2 not calculated on Footprint.
DE702	Appropriate Reporting Units are not shown on IE 7.
DE704	Total CO2 Emissions is not shown on Review Footprint Stop.
DE707	More Space is required between page numbers in pagination.
DE719	Groups and source data entered for parent activity appears on the parent activity after creating and deleting child rows.
DE723	Efficiency and Offsets totals are not rounded off.
DE726	Pagination does not display which page the user is in.
DE729	Input Quantity field enabled for Calc Input Units not selected.
DE730	Help Content Issues.
DE737	Space required between Year value and text years on Update Years form – staging issue.
DE739	Help wiki defects -test and staging environment.
DE778	Round off numeric values in pdf file to two decimal places.
DE779	New Colors for Charts in Pdf.
DE794	SIC Category, SIC Code and sub code to be displayed in alphabetical order

3.1.4 Known Issues

This section lists the known issues in this release.

3.1.4.1 Major Issues

The following are the known major issues in this release:

Defect ID	Description
DE670	Review Plan and Facility stop shows fails to retain the country selected through form
DE677	Activities with child rows expands on changing the CO2 emissions units
DE740	Country selected on the grid fails to show on overlay form after editing the country in the grid
DE774	Relogging into CPT by doing an interim save gives exception.
DE792	Session not timed out on Sandbox with login

3.1.4.2 Minor Issues

The following are the known minor issues in this release:

Defect ID	Description
DE627	Clicking on Insert row icon for any activity expands all the activities with child rows.
DE672	Grids calculate or Review Footprint stops are in expanded form on navigating to the stops from any other stops
DE748	Process indicator (Revolving Icon) not appearing on Clicking Sandbox and Carbon Planning tool button on Firefox
DE753	Countries in report not aligned correctly.
DE790	Search alignment issues in IE
DE801	Scroll bars are not fixed in SIC Overlay

4 Earlier Releases

4.1 Release 1.4

The added features, enhancements and issues for release 1.4 are listed in the sections and sub-sections here.

4.1.1 New Features

This section details the new features in the application for this release.

Multiple Emissions Activity Row for a Facility

This feature on Footprint Details lets users add footprint activity rows to an existing facility. The Calculator is available for all the rows for a facility. Users can delete any added activity row for a facility except for the parent facility row.

Carbon Plan Update

This feature now allows users to update an existing plan. Users can update the company name, plan name, period definition and facilities from this screen. The plan update screen can be used to add new facilities.

End User Reports

Prepare Report feature helps users generate annual reports for the carbon emissions reduction plan for selected periods. Users can add additional company details and description to the report, and view and save the report in PDF format. The report details the individual components for the emissions reduction plan and provides graphical representations.

Automatic calculation on Carbon Footprint Calculator form

This feature helps calculate the CO2 emissions automatically based on emission factors on entering an input value.

4.1.2 Enhancements and Modifications

This section lists the enhancements and modifications to the application in this release.

Data modified on Sandbox

The prefilled data for the grids on the Sandbox has been modified to meet Goal requirements.

User Name now replaces User ID

For a logged in user, the display for User ID is now replaced by User Name.

Enhancements to Navigation

Navigation is modified for the following to enhance the user experience:

- **Next** button changed to **Continue**.
- Orange arrow removed.
- **Back** button arrow coloured gray.
- Pagination arrows modified to be separate from other functions and moved to below tables.
- Pagination includes page numbers to jump to pages and dynamic item information.

Footprint Calculator Changes

UI enhancements to the Footprint Calculator form to enhance the user experience. The changes include realignment of fields, modification of field names and confirm messages.

Help system changes

The help is reformatted to enhance the user experience and the content is updated to sync with the latest release. The help is renamed from 'Wiki' to 'Help'.

UI Modifications

The UI has been modified for the following:

- Total display fields for efficiency reductions and offsets.
- Radio button removed on the carbon plan summary.
- Gray colour removed from display fields.
- Realignment of fields and grids
- Replacement of icons and addition of new icons.

Left pane buttons entirely clickable

The total area of the buttons on the left pane is clickable.

List of Offsets modified

Climate Reserve Tons (CRT) has been added to the list of Offsets.

Left pane buttons entirely clickable

The total area of the buttons on the left pane is clickable.

Facility grid changes

The facility grids UI has been modified. The changes include realignment of fields and menus, and icon issues.

Plan Summary – plan complete indicator

The plan summary screen displays a message indicating the completion of the plan.

Goals changes

The Goals screen is modified to display Absolute and Intensity options as radio buttons and the drop-down selection is removed. Percentage and Actual value fields can now accept negative values. The positive value for goal is plotted on the graph and the

negative value is not plotted on the graph. The information for the negative value is shown as a message on the graph.

Define Period changes

Term is modified to **Year** on the Define Period screen.

Define Facility – Control list box changes

New selections, **Both** and **None** are added to the Control list box on Define Facility.

4.1.3 Fixed Issues

This section lists the issues that are resolved in this release.

4.1.3.1 Major Issues

The following are the major issues resolved in this release:

Defect ID	Description
DE614	Efficiency Reductions and Offsets retains the values from the period last visited.
DE617	Back Period slider does not display on carbon plan summary.
DE618	Clicking periods on graph throws Java Script error on carbon plan summary.
DE619	Sandbox does not display grids for users not logged into OCW.
DE620	Search text box and button on MY Footprint and Sandbox is different compared to other OCW tabs.
DE624	Footprint total in reporting units does not show appropriate values.
DE625	Static Reporting Issues.
DE630	Graph plots goal data and not target goal value.
DE632	Absolute and Intensity Goal value field are disabled on entering minus sign.
DE633	Behaviour of digits before decimal and after decimal in Goal stop is not consistent.
DE638	Review Carbon plan stop is not displayed.
DE639	Review Carbon plan page does not display by default for saved plan.
DE640	Unable to enter negative sign in Absolute goal and Intensity goal after entering nine digits before decimal.
DE643	Goal Value does not accept negative number in Sandbox.
DE644	Update Plan train is not accessible.

Defect ID	Description
DE645	A Java Script error is displayed when error message is thrown on IE.
DE648	Using pagination buttons in Edit Plan displays Review Plan Page.
DE650	Target is not being plotted if the emissions are in decreasing order for various periods.
DE651	Efficiency and Offsets are not displayed for newly added periods on updating the plan.
DE652	Footprint grid accepts non-numeric values.
DE653	Footprint calculator form is not displayed.
DE654	Yikes error displayed on clicking Edit Report icon.
DE656	Newly added periods are not displayed on Prepare Report stop.
DE657	Edit Company Name ,Edit Plan Name, Edit Facility Details in Edit Plan stop and Edit facility in Define Facility Stop do not respond.
DE659	Issues on Facility Details form in Edit Plan Stop.
DE660	UI is not blocked on clicking Add on Overlay pop-up for facilities on Update Plan stop.
DE661	UI is not blocked on clicking Add on Overlay form for facilities on Update Plan stop.
DE662	Report is not displayed on IE 6 and IE 7.
DE664	Report not opening on IE 6.
DE667	Delete button/icon not present for child Activities rows in Calculate footprint stop.
DE673	Total CO2 Emissions (in Reporting Units) not calculating and displaying correct values.
DE676	CO2 emissions cannot be entered for activity Electricity - IE 6 issue.
DE679	Changing units for child emission rows does not round off to two decimals.
DE680	Clicking Edit report displays a pop-up with an exception message.
DE681	Facilities do not get filtered on Calculate footprint stop.
DE684	Null text is displayed for "Total CO2 Emissions (in Reporting Units): " on Calculate footprint and Review Footprint Stop.
DE686	Facility is not added on update plan after error message for duplicate facility is shown. Firefox issue.
DE687	(Copy of) Target is not being plotted if the emissions are in decreasing order for various periods.

Defect ID	Description
DE688	Junk numbers are present in parent activity on deleting the last child activity.
DE689	CO2 emissions unit and CO2 emissions in reporting units on calculator form shows 1 and 0 and Total CO2 Emissions (in Reporting Units): turns 0.0.
DE690	Parent Activities CO2 emissions value are retained after deleting the child rows.
DE691	Issues in plotting Goal Data on Graph.
DE694	Issues on Saved plan with child rows.
DE695	Total CO2 Emissions (In Reporting Units): adds up to value existing before save.
DE696	Delete buttons for child rows are replaced by Insert row icons on saving and re-navigating to Calculate footprint stop.
DE697	Calculator form issues for child activity for a saved plan.
DE698	"Calculate My CO2 Emissions In:" drop down shows "Please Select" on calculator form.
DE699	Goal Value does not change on editing the Footprint data.
DE700	Calculator form fails to show default values after editing the data in the grid.
DE703	Values on Efficiency and Offsets grids become zero on re-navigating to the stops - IE 7.
DE705	Facility and Activity filters fail to default to "All" on re-navigating.
DE712	Emission Source Factor dropdown defaults to blank after clicking OK on the Clear popup window.
DE713	Update Plan shows only one facility on the grid on clicking OK button on the form - IE 7.
DE721	Facility Name displays the last visited facility on displaying error.
DE724	CO2 Emissions value does not show the edited value for the first time after saving plan through footprint details stop.
DE728	Totals In Review Footprint and Footprint Details stop not shown appropriately.
DE735	Control drop-down displays only Operational and Financial on staging.
DE736	Facility overlay form closes after clicking on Add button in define facility stop on IE 6 and IE 7. Staging issue.
DE738	Issues in report – staging issue.
DE742	Graph legends are missing on graph.

Defect ID	Description
DE744	Process indicator does not appear immediately on clicking save on IE 7.
DE745	Footprint total on sandbox for period Jan 11 is incorrect on staging.
DE750	Review Footprint total adds the efficiency and offsets totals to footprint totals - test and staging.
DE751	"Exception occurred please retry" message displayed on Footprint, Efficiency and Offset stops with multiple delete and create.

4.1.3.2 Minor Issues

The following are the minor issues resolved in this release:

Defect ID	Description
DE563	Wrong error message displayed when a duplicate facility is added.
DE569	Help scroll bar alignment issue.
DE613	Mouse cursor is not present in Facility Name field on Facility Form. Firefox browser issue.
DE616	Required UX modifications.
DE626	Review Footprint - alignment issues for LHS for all Trains on IE 6.0 and IE 7.0.
DE628	Below Base Year text is displayed for review goal and carbon plan summary for intensity and absolute goal value.
DE629	No validation functionality for fields on Prepare Report stop.
DE631	Firefox does not display scroll bars by default on Prepare Report stop whereas on IE it does.
DE634	Goal Absolute and Intensity accepts more than nine digits for negative values.
DE635	Display for 'My goal is to reduce my GHG emission by' not consistent on Goal Details, Review Goal and Carbon Plan Summary stops.
DE637	White dotted border is displayed on LHS on selection of a train – on Firefox.
DE649	The lower edges of the edit window displayed in Edit Plan Stop are not aligned correctly - IE 7 and Firefox.
DE658	Train stop and form mismatch.
DE663	Tooltip for report shows "Edit Report" in Prepare Report Stop.
DE668	Collapse icon is not displayed correctly on in calculate footprint stop.
DE675	'Clear' button missing in Report.
DE678	Image for '=' and '-' not loaded on clicking Insert Row icon. On Firefox

Defect ID	Description
	no icon is displayed.
DE683	Clear Functionality does not work on Calculator form and Prepare Report form.
DE685	Expand and Collapse icons are missing on Firefox.
DE701	Reporting CO2 not calculated on Footprint.
DE702	Appropriate Reporting Units are not shown - IE 7.
DE704	Total CO2 Emissions is not shown on Review Footprint Stop.
DE707	More Space is required between page numbers in pagination.
DE719	Groups and source data entered for parent activity appears on the parent activity after creating and deleting child rows.
DE723	Efficiency and Offsets totals are not rounded off.
DE726	Pagination does not display which page the user is in.
DE729	Input Quantity field enabled for Calc Input Units not selected.
DE730	Help Content Issues.
DE737	Space required between Year value and text years on Update Years form – staging issue.
DE739	Help wiki defects -test and staging environment.

4.1.4 Known Issues

This section lists the known issues in this release.

4.1.4.1 Major Issues

The following are the known major issues in this release:

Defect ID	Description
DE580	Processing indicator overlapped by Control drop down on Facility Details form on IE 6.0.
DE605	Tabs and status header for My Footprint and Sandbox does not match other tabs in OCW.
DE607	Inconsistent behaviour on logging into OCW.
DE714	Calculator drop downs shows "Please Select" as default value instead of "Eg value"
DE718	Issues with pagination and filtering in Calculate footprint stop.

Defect ID	Description
DE732	Exception message is displayed after we get an error message on Facility overly form in Define facility stop.
DE733	Enter key does not function on footprint detail's calculator pop-up screen.
DE734	Issues with using 0.00 as initial value for numeric field.
DE740	Country selected on the grid fails to show on overlay form after editing the country in the grid – staging issue.
DE743	User is not logged out from My Footprint and Sandbox on logging out from other OCW tabs on staging.
DE754	Data entered is retained after closing the browser and relogging without saving on staging and QA.

4.1.4.2 Minor Issues

The following are the known minor issues in this release:

Defect ID	Description
DE314	Login Name field alignment issue in Login page.
DE325	Login details not displayed on My Footprint page for a user logged into OCW.
DE472	Grid displays empty screen for two seconds when user adds facility name in grid.
DE483	Pagination Filter is not set to default page if an Activity filter is selected
DE551	Browser status bar does not display OpenCarbonWorld for a few periods on carbon plan summary.
DE573	Help scroll bar placement issue on navigating through trains.
DE606	Tooltip for Sandbox tab not shown from other tabs.
DE608	Login Screen has blank space on RHS - IE 7.
DE621	Text field behaviour on clicking.
DE622	Order of Facility entered is reversed on clicking Save for first time on facility grid.
DE641	Cannot edit goal if there are maximum digits before and after decimal point.
DE642	Live Search window is not displayed for sandbox and My Footprint tabs.
DE669	Reporting units drop down on sandbox in IE 6 overlaps live search.
DE670	Clicking on Insert row icon for any activity expands all activities with child rows.

Defect ID	Description
DE671	Groups, Sources, Type, Subtype and data source placement in calculate footprint and Review footprint stop.
DE672	Grids on Calculate Footprint calculate or Review Footprint are in expanded form on navigating back from other stops.
DE677	Activities with child rows expand on changing CO2 emissions units.
DE692	New Child rows not always added as the first row under the corresponding activity.
DE693	Hand icon shown on Mouse hovering the blank calculator column in parent activity.
DE706	Pagination buttons are not positioned correctly on Prepare Report Stop -IE and FF.
DE708	Pagination format to be changed when there are more number of pages to be displayed.
DE709	Page Count should be displayed on top of the grids.
DE710	Alignment issues for period, plan, protocol, activity, facility and total CO2 emissions on IE and Firefox.
DE711	Previous and Next buttons for pagination has background colour - IE 6.
DE715	Lower edges of calculator and Prepare Report form not aligned correctly-IE 7
DE716	Blank Screen displays when clicked on Add button on Facility form in Edit Plan Stop-IE 7.
DE717	Icons not shown in help content.
DE720	Tool tip text not displayed for pagination icon : FF
DE731	Footprint Details - Groups field accepts characters more than 20.
DE741	Grid alignment issue on carbon plan summary on FireFox.
DE746	Graph legend issues.
DE747	Goal field popup flickers on mouseover on Firefox.
DE748	Process indicator (Revolving Icon) does not appear on clicking Sandbox and Carbon Planning tool button on Firefox.
DE749	Few units for Goals, plan summary and sandbox aligned very close on staging.

4.2 Release 1.3

The added features, enhancements and issues for release 1.3 are listed in this topic.

4.2.1 New Features

This section details the new features in the application for this release.

Delete Plan

This feature helps users delete a plan from the review plan and plan summary screens. Users can delete an existing plan and create a new plan.

Save Plan

Users can save a plan to the database at any stage of the plan creation, or modification process.

Quit Plan

Users can quit the carbon plan creation at any stage of the plan creation and reject any unsaved data.

Intensity for Goal Details

Users can select Intensity for goal to reduce GHG emissions. Users can select from Absolute or Intensity for Goals.

4.2.2 Enhancements and Modifications

This section lists the enhancements and modifications to the application in this release.

Sandbox tab added to the navigation tab area

The Sandbox tab was previously available under the **My Footprint** feature as **My Sandbox**. This is now an independent feature.

Access to the Sandbox does not require a user login

Users were required to login to My Footprint to access the Sandbox tab previously. This authentication feature has been removed and users can now access without logging into the portal.

Mouseover tooltips

The tooltip's click and view operation is now modified to a mouseover function.

Removed list stops

Removed screens with list stops from Footprint, Efficiency Reductions and Offsets trains. This reduces the number of screens and improves performance.

Removed Graph from screens and provided it on-demand on review pages

The graph feature present on all the carbon planning tool screens is now modified and appears only on review screens. The dynamic graph rendition in the earlier version is now an on-demand feature and is rendered in an overlay window.

Calculator form modified

The calculator form in the footprint screen is modified for better UI and the addition of a Calculate feature.

Selected Period is reflected for navigation across screens

The user selected year remains in focus when navigating between screens and is maintained as the default, and does roll back to the base year for navigation to another screen.

Removed Edit Known Emissions

The Edit Known Emissions feature is removed from the Footprint Calculation screen and this feature is now available directly on the Footprint Details screen grid.

Removed Print and Cancel

The Print and Cancel features are removed.

Actual in Goals modified to Absolute

The actual value for Goal reduction is now modified to Absolute.

Changes to the User Interface (UI)

The UI is modified to enhance the user experience and improve the look-and-feel of the application.

4.2.3 Known Issues

This section lists the known issues that are not resolved in this release.

4.2.3.1 Major Issues

The following are the known major issues in this release:

Defect ID	Description
DE325	Login details are not displayed on navigation to other tabs of OCW when user logs in from Sandbox or My Footprint page. User Name details displayed on the My Footprint and Sandbox tab does not match the details on other tabs on OCW.
DE614	Efficiency and Offsets pages retain values from the last selected period.
DE617	The appropriate Period (Back) slider is not displayed on Plan Summary.
DE618	There is a JavaScript error on clicking periods on graph in Carbon Plan Summary.

4.2.3.2 Minor Issues

The following are the known minor issues in this release:

Defect ID	Description
DE569	The wiki scroll-bar alignment is incorrect.
DE613	The mouse-cursor is not present in the Facility Name field on Facility Form on Mozilla Firefox.
DE616	UX changes to the CTP.
DE620	The Search textbox and button on My Footprint and Sandbox does not match the search textbox and button on other OCW tabs.
